

To write a PL/SQL program to find sum of first n natural numbers.

Program

```
declare

    str varchar2(50):='&str';

    rev varchar2(50);

    len number;

begin

    len:=length(str);

    for i in reverse 1..len

    loop

        rev:=rev || substr(str,i,1);

    end loop;

    dbms_output.put_line('Reverse of String is: ' || rev);

end;
```

Output

```
SQL> /
Enter value for str: zameel
old 2:      str varchar2(50):='&str';
new 2:      str varchar2(50):='zameel';
Reverse of String is: leemaz

PL/SQL procedure successfully completed.
